DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph; as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 17 is dependent on 15, Claim 15 selects the species active silica from the markush group of claim 1. Claim 17, selects a different species of the markush group, it is unclear which species the applicant is choosing.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3761

5. Claims 1, 3, 5, 7-11, and 15-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Morman (5,914,184).

6. With respect to Claim 1, 3, 5, 8, 9, 11, 15, 16, 18 and 20: Morman discloses the use of an absorbent article (see Figure 4), that contains particles of silica or alumina, and coated with a fatty acid such as stearic acid (see column 8, lines 1-13).

7. With respect to Claim 7 and 18: these claims are directed to a non-selected species of the Markush group in Claim 1 and 11.

8. With respect to Claim 10 and 21: Morman discloses the material above is in particle form and the particle (in bulk) are dispersed throughout the matrix. The examiner considers the fact that there is more than one particle dispersed, therefore there is more than one material dispersed. (see column 8, lines 10-13).

9. With respect to Claim 22: see Column 1, lines 19-25.

Response to Amendment

10. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
